* Requires Garmin Form to be installed

** Despite no longer available for sale, Garmin, SPOT, and Aware360 continue to support these specific models

† Garmin SE+ And Explorer+ have Precanned messages in the Garmin Form, messages cannot be modified

‡ Spot, Garmin, and Bivy Standalone are one way communication devices only, you cannot message or receive messages from Control Centre confirming you are logged in or your emergency has been received

Incorporating satellite devices into your lone and at-risk worker safety plan ensures reliable communication and emergency response in remote areas where cellular coverage is limited. These devices provide critical features like SOS alerts, location monitoring, and two-way communication, acting as a lifeline during emergencies. Choosing the right satellite device is essential to meet your organization's unique safety needs. This matrix simplifies the decision-making process, helping you find the best solution to keep your workers connected and protected.
